SPONSOR FOR IMPACT

This year we are excited to launch a new initiative, **Sponsor for Impact**. After four full years of ministry, we have built an amazing team, have refined our ministry offerings and are excited to move into the future. In those four years we have seen far greater impact on individuals, pastors, churches and communities than we would have anticipated. We are always looking to grow and expand that impact in ways that make sense based on need. Certainly, there are many needs in churches around the world and we do not want to imagine a world without healthy churches. Sponsor for impact gives *you an opportunity to make a difference* in an individual pastor, church staff member or church in the United States and around the world. We are offering many different sponsorship options at a variety of different commitment levels. As we think about this year, we are needing sponsorships for **20 more Pastors and Ministry leaders for our Pastors4Pastors initiative**. You can sponsor one of these leaders for just \$50 a month, giving them access to a tremendous network of support. We have also launched our education initiative for ministry leaders in areas of poverty around the world. In partnership with Kairos University here in the United States we are able to offer certificate, Bachelors and Masters programs to these pastors utilizing technology, as well as our trips to these areas. For just \$100 a month **you can sponsor an educational program for a pastor in a developing area**. Right now we currently have 3 students who have been vetted who are looking for sponsors. We appreciate your prayers, partnership and support. We hope that you will consider joining us in making an impact through sponsorship. You can [learn more about opportunities](#) to sponsor on our website under the 'support' tab.

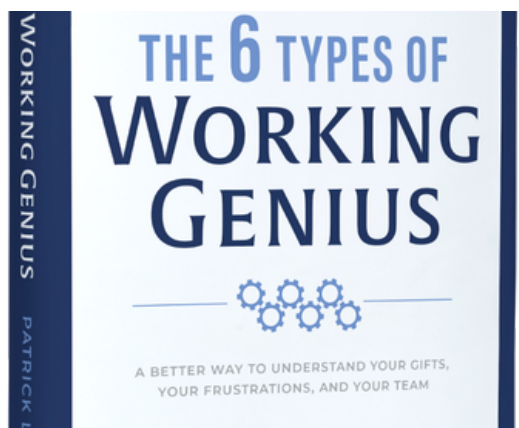

3/7 - 3PM-4:30PM WORKING GENIUS PRIMER

QUOTE

"We often function in two extremes, over-focusing on reality or denying it completely. We get caught up in being entirely negative or pessimistic or overly positive and optimistic. Both have value, but our focus must be on moving forward, focused on hope."
